

Hockey Gala Afternoon

Mr Green recently brought 2 assistants to help with the Hockey Gala Afternoon. The demonstrators were Krysten (state squad hockey member who has been playing hockey since she was 4) and Cooper who is a

valued member of the Bundaberg Hockey participation team.

They set up a 3 activities which were: Dog'N'Bone in the new inflatable field, 'modified Street Hockey' and 'Rob the Nest'.

Participation Program will start at the Bundaberg Hockey Fields on the **21st July, 2018** on Thornhill Street, North Bundaberg.

This program runs for 8 weeks — Saturdays 9am—10:30am.

Cost is \$100 for the 8 week course.

A Hockey pack is included to the value of \$55.

Go to the website <https://www.qld.gov.au/recreation/sports/funding/getinthegame/getstarted> to find out information regarding a voucher which will cover the entire cost of this program.

Students enjoyed this activity, being active, getting out in the sunshine and learning new skills with qualified teachers.

Technology

In our Technology (Design) unit, Prep/1/2 are working towards making a fruit salad kebab. To that end, we looked at fruit and vegetables and discussed how they were grown. We talked about fruit that would be suitable for a kebab and those we couldn't use. Students took home a piece of fruit or a vegetable to try at home

We linked healthy eating to healthy bodies. If we eat healthy foods each day we can do activities like concentrating at school to complete our work and even do exercise on the oval.

Life Cycle Of A Plant

Prep/1/2 looked at plants and flowers. We realised that when the dead flowers are picked they had produced seeds. When these seeds are placed back into the ground they grow tiny shoots which appear above the ground. These then become seedlings which then grow to become a plant. Then a bud is formed which forms into a flower again. This is the life cycle of a plant! It is so amazing.
