

Prep-1-2-Rotational Activities

Prep-1-2 have been very busy in the classroom. During morning literacy rotations the class has been working hard on reading, writing, spelling, listening and fine motor activities. We have been having fun learning our word families. Ms Barnes is so impressed at how well everyone has been learning to move quickly and quietly around the room between activities.

Rainbow Ralph has joined our classroom. He is a very special teddy who watches how hard everybody is trying and who is following our classroom expectations. Each Friday Rainbow Ralph chooses a Star of the Week! This lucky person is rewarded and takes him home for the weekend. We have a book which shares all of the adventures he will get up to over the remainder of the year.

Rainbow Ralph chose Zara to go home with as the first 'Star of the Week'. We were very, very excited to see the photos of all the adventures he got up to—even going to the park! He is one very lucky bear to be a part of the Prep-1-2 classroom. On the 2nd week Rainbow Ralph chose Lachlan. We are looking forward to what adventures they get up to.....

Rainbow Teddy

Breakfast Club

School Leaders are running the Breakfast club on Tuesday, Wednesday and Friday mornings, starting at 8:30am in C Block. On these days Weet Bix and fruit are supplied for students. The leaders are doing a great job at serving and cleaning up afterwards.

Chappy Evan is still making toast on the two days that he is here. (Monday and Thursdays).

A big thankyou to Mr Graham Bunter from Chemist

Warehouse for donating products for our Dental Hygiene at Central School. Every student at Central is now cleaning his/her teeth at the end of 2nd break.

The 'Tooth Fairy' visited the students to educate and show them exactly how to brush and look after their teeth. A graph of the sugar content in drinks was displayed for the students to see. It was astounding just how much sugar these contain. They are now more aware of the hidden sugar in each products they eat. The students cleaned their teeth and then were given a pink tablet that showed exactly how much plaque was left after brushing! The students were amazed.
